- Developing list with budget for all Equipments
- Room Layout & Space Planning Requirements
- Equipment Selection & Procurement
- Equipment Installation & Commissioning

You Dream, We Create

Our Team of Hospital Managers, Quality Experts, Planners, Engineers and Architects will ensure the Hospitals we establish for you are:

Accreditation compliant – NABH & JCI

Our Organisation is India's pioneering and largest Hospital Accreditation Advisory Group. Our Team of Quality Professionals, Hospital Planners, Designers and Architects will ensure that the requirements of the National Accreditation Board of Hospitals and Healthcare Providers (NABH) and the Joint Commission International (JCI) are fully met, right from the design stage of the Project.

Our designs will help your Hospital be perceived as one passionately and meticulously focused on meeting the needs of your Patients, their Families, Guests and your Staff. We ensure the **Space requirements**, right from how much area to be provided for proper ventilation and privacy, **Facility requirements** like infection control, patient safety alarm systems, fall prevention measures, ramps & toilets for physically challenged people, **Amenities & services** like playroom for children, CCTV cameras, a prayer hall for patients and their relatives etc.

Patient Friendly

Green - Environment Friendly, Energy Efficient

Green Hospitals are Environment Friendly, utilizing natural resources in an efficient manner, which also enhances patient well-being. We help design Hospitals to be 'Green' from planning stage itself and then through the detailed architecture and construction stages. Designed right, Green Hospitals not only save on major costs like on Energy and Water, they help faster patient recovery, through better use of day light.

Designing for Lean and Smart Hospitals is to ensure we do not build even one extra square foot of space that does not add value for the Patient. The services are organized in a streamlined manner so that the patient waiting time between adjacent process is minimum and all process delays are removed. The patient and staff movement between processes is also minimized so that overall patient experience in the hospital is made pleasant and timely. *The patient pays only for the value of services provided and not for the inefficiency of non-value activities.*

Lean & Smart

ACME Consulting

Our Flagship Company

India's Largest Health Care Quality Advisory Services Group.

Consultants for:

NABH for Hospitals, Clinics, Blood Banks, Imaging Centres, Dental Clinics & Ayurveda Hospitals

ACME assists medium to large Healthcare Organization to successfully strive for this highest Healthcare Quality Standard developed by the Quality Council of India on par with International Accreditations.

NABH Entry Level Standards for Hospitals ('SILVER' Certificate of AB-PM-JAY)

The new Hospital Quality Pre-Accreditation Entry Level Standards from NABH is for smaller hospitals who find full NABH difficult. It is made mandatory today by Insurance Regulator IRDA for Private Insurers and Government Agencies.

NABL Standards for Labs

Labs providing various test services covering Haematology, Clinical Bio-Chemistry, Clinical Pathology, Microbiology, Histopathology, Cytopathology, Genetics, etc can aspire to get accredited under ISO/IEC/15189:2012 Standards.

JCI Accreditation for Hospitals

Assist Large Hospitals, mostly NABH Accredited, for the prestigious Joint Commission International (JCI) Accreditation.

BRONZE Certification under AB-PM-JAY

These standards from QCI assure the very basic Healthcare Services with emphasis on patient safety, hygienic & clean environment. They are minimum requirements needed to get empaneled under AB-PM-JAY Scheme.

Senior Team Members

- **BG Menon**, Managing Director
- **C S Ramakrishnan**, Chief Executive Officer
- **Suresh Shenoy**, Senior Vice President
